What is Discharge Concierge?

A Concierge for Inpatients:

- Patients self-complete state-mandated, “need-to-know” disease-specific coursework prior to discharge.
- Personalized, automated and enhanced for optimal cognition.
- Improve patient satisfaction.
- Re-focus the nursing staff on direct clinical care
 - Practice at the top of their license
 - Increase their joy in practice..

All you need to know **BEFORE YOU GO!**

Pascack Valley Medical Center's **Discharge Concierge™** delivers the information that you need to care for yourself and your baby once you leave the hospital.

Visit: www.PVDIScharge.com

**At Pascack Valley Medical Center,
You Are Our Number One Priority.**

Your Education - On Your Schedule

- ✔ Log into www.PVDIScharge.com
- ✔ The system will present you with your "To Do" list of content to be completed prior to discharge.
- ✔ Select your "course" and read through the "classes" included.
- ✔ As you read each article, mark it completed and move on to the next.
- ✔ Save questions to your "notepad" for discussion with the nurse once you've completed your requirements.
- ✔ Share any or all of the articles via email or text with yourself, your spouse, or a caregiver for future reference.

**At Pascack Valley Medical Center,
You Are Our Number One Priority.**

To access the Discharge Concierge™ simply visit www.PVDIScharge.com

Nationally, nurses spend only **44% of their time** on clinical care; the balance is spent on non-clinical support activities.*

**American Journal of Nursing*

Almost half a million registered nurses have already left their profession nationwide, citing high workloads and limited staffing as reasons for their departure, and more than 60% of the nurses surveyed reported being forced to work "voluntary overtime."**

**Source: Department of Professional Employees

For every 10% of nurses at a given hospital who reported feeling unsatisfied with their job, patient satisfaction decreased by about 2%, even after other factors were taken into consideration.**

***Source: Department of Professional Employees*

BEHAVIORAL Rx[®]
The Science of Precision Health.

GOMOHEALTH

BehavioralRx® is the science of personalized patient engagement; a proven behavioral and cognitive science using proven psychological techniques and cognition to motivate in-the-moment actions:

- **Emotional attributes** such as trust, credibility, outlook, reciprocity
- **Cognitive functions** such as brain encoding, storage, retrieval
- Uses behavioral technology to get people to want to listen, learn, be “**resilient**” and stay on course.

BEHAVIORAL Rx
The Science of Population Health.

GOMOHEALTH

The Science of Precision Health

GOMOHEALTH

Discharge Concierge™

GOMOHEALTH

The Discharge Concierge™ is a web-based solution that allows patients to access the mandatory (and supplemental) information they need to read, understand, acknowledge receipt of and “teach-back” prior to discharge.

Increased Patient Activation and Provider Joy in Practice

Discharge Concierge provides patients self-activated access to mandated information, allowing them to read, understand, and acknowledge their comprehension prior to discharge.

The Patient Experience

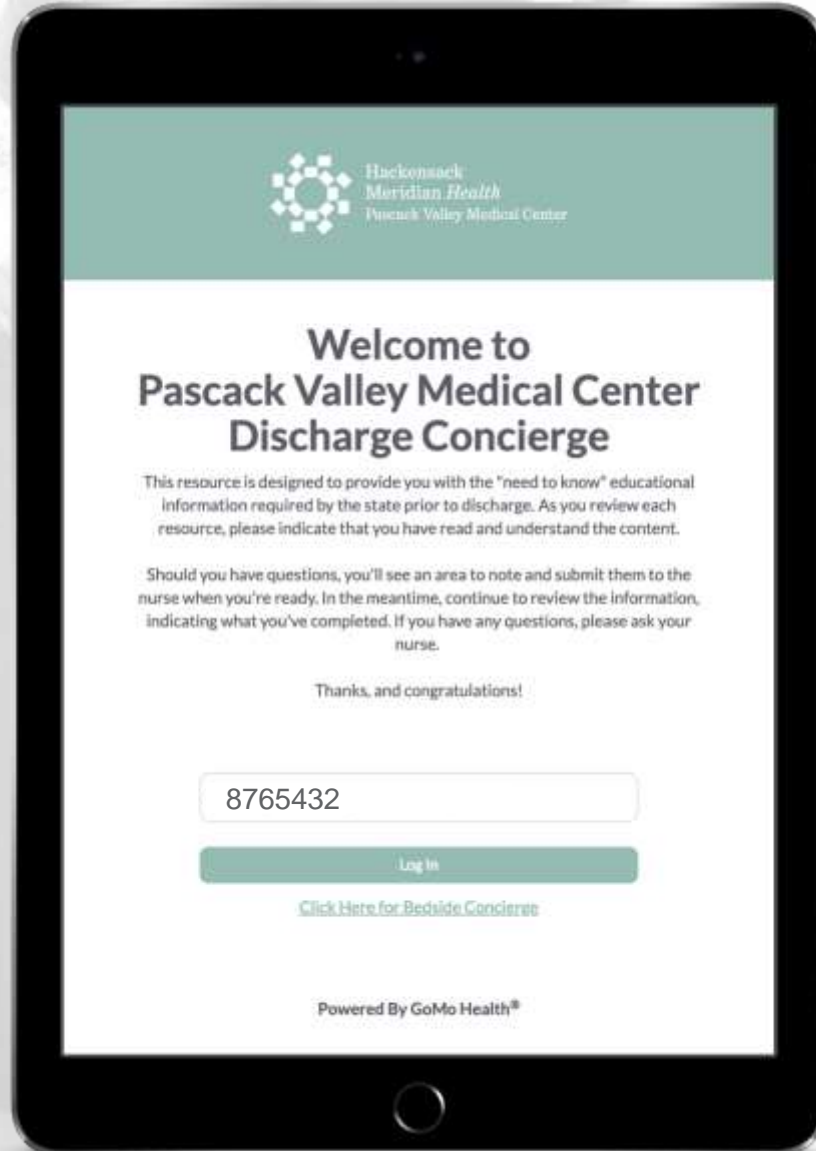

GOMOHEALTH

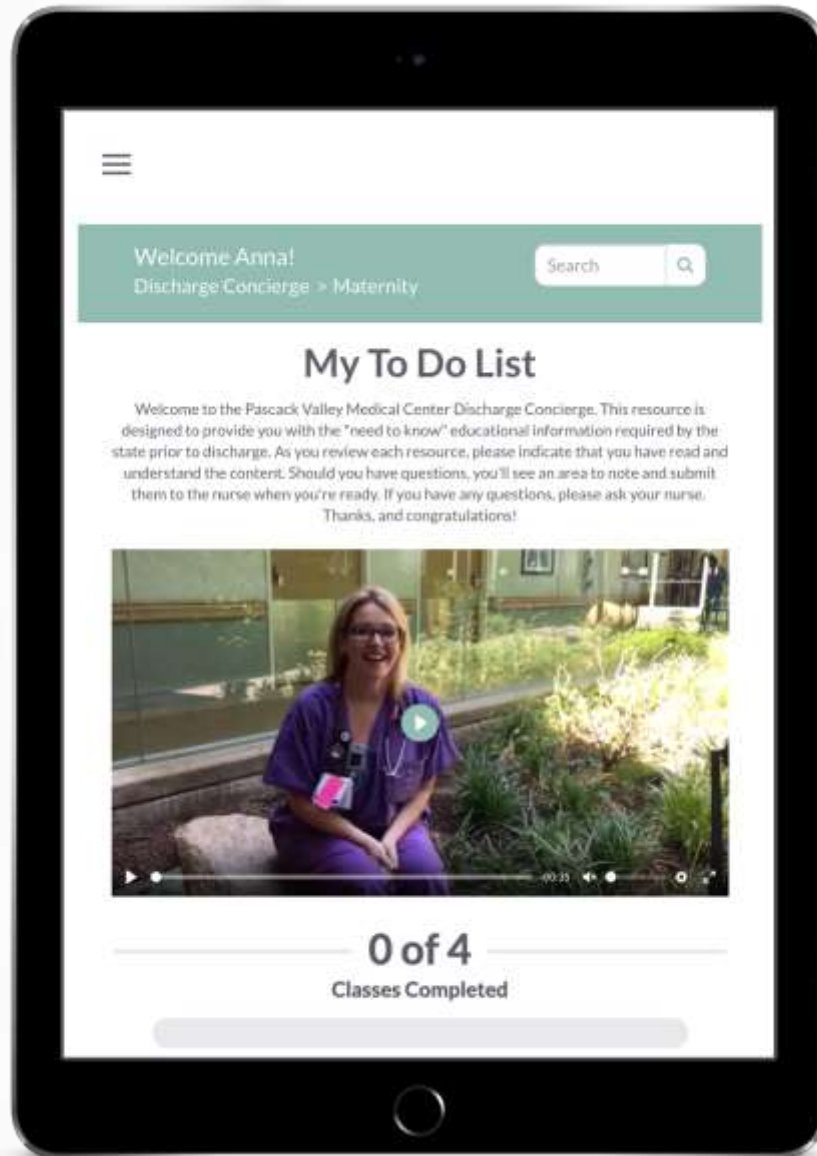

Patient Experience - Overview

- Once settled into their room, patients are given a hospital supplied tablet with access (only) to the Discharge Concierge.
- The nurse explains how to access the content.
- Patients read, acknowledge understanding of content and move to next piece of information at their own pace.
 - Any questions for clarification are noted by patients in a digital notepad.
 - Nurses preview patient completion status in admin panel, reviewing any patient questions and allowing nurses to prep to respond before discussing with patient.
- Patients have option to share info with themselves, caregiver or friend (text or email) for post discharge reference.
- Patient completion is auto logged in EHR via API.
- Patient fulfills JCAHO teach-back requirement by discussing content with patient educator.

- Once settled into their room, patients are given a hospital supplied tablet with access (only) to the Discharge Concierge.
- The nurse explains how to access the content.
- Patients log in.

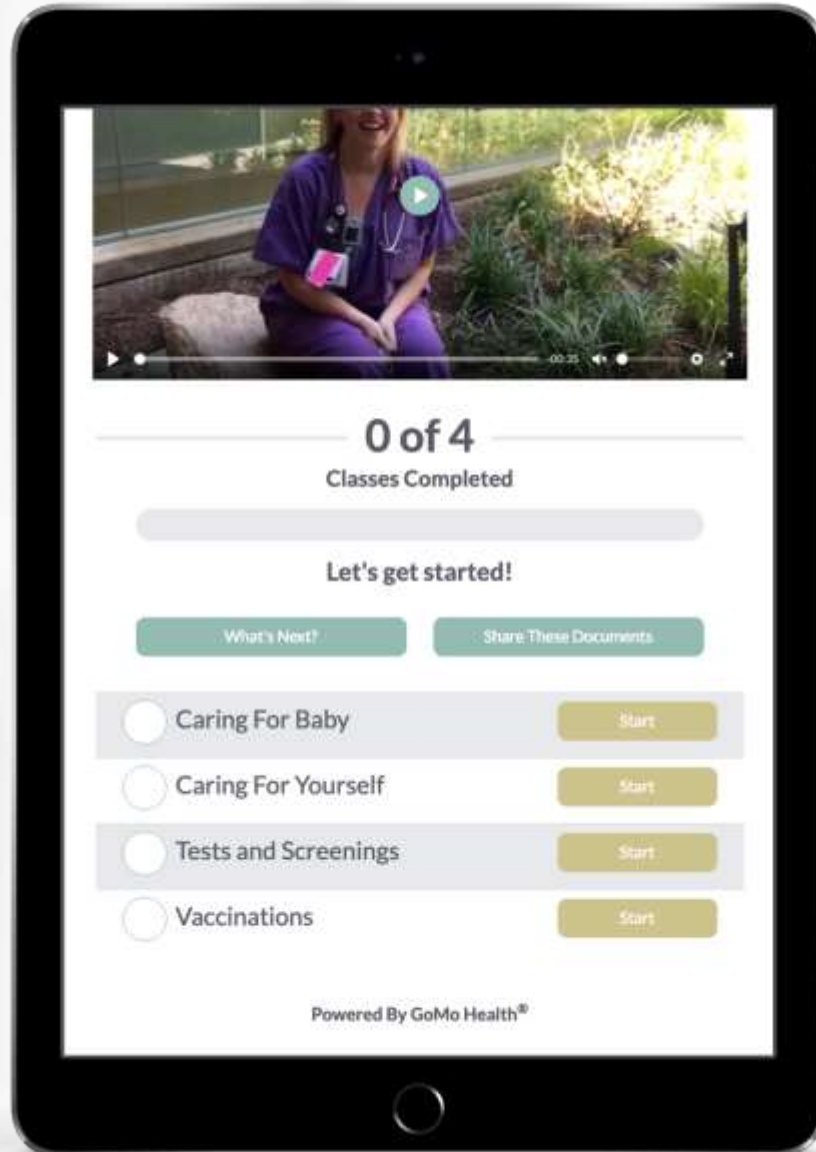

Patients' first view:
Intro video by head clinician socializing the program to the patient.

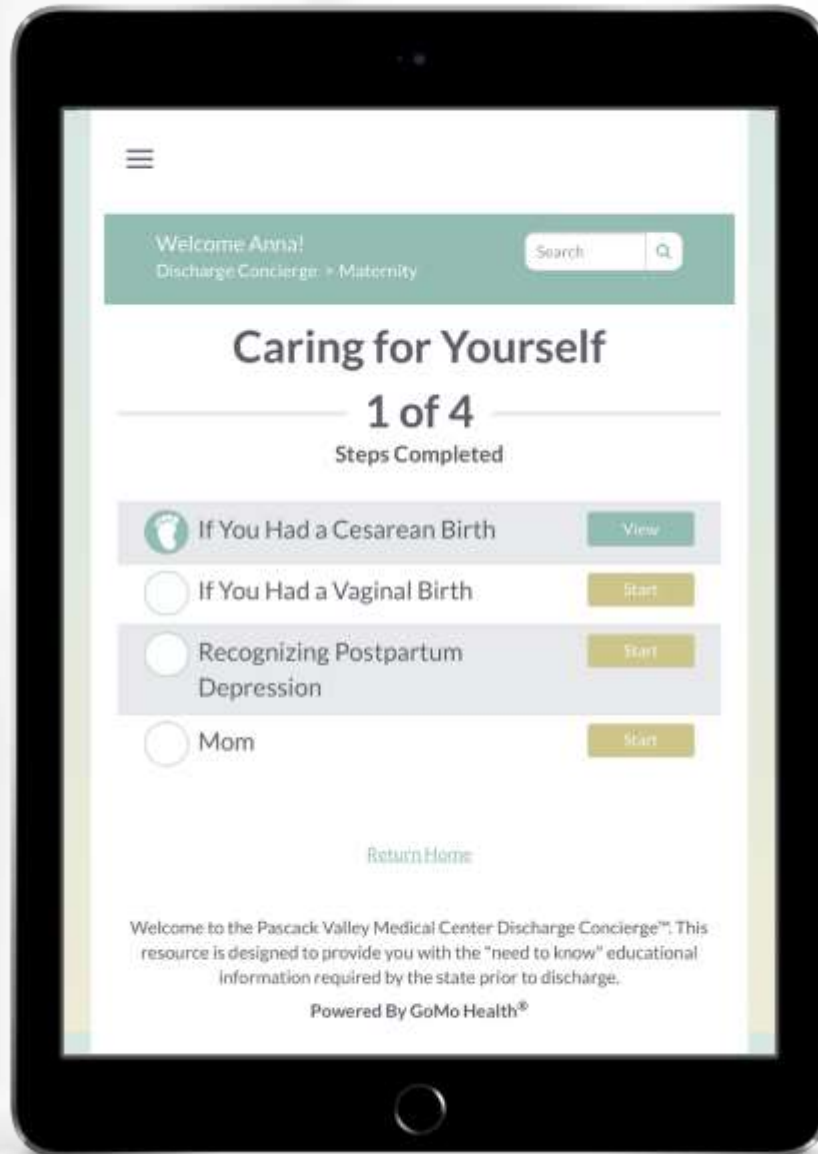

In-the-Moment Patient Experience

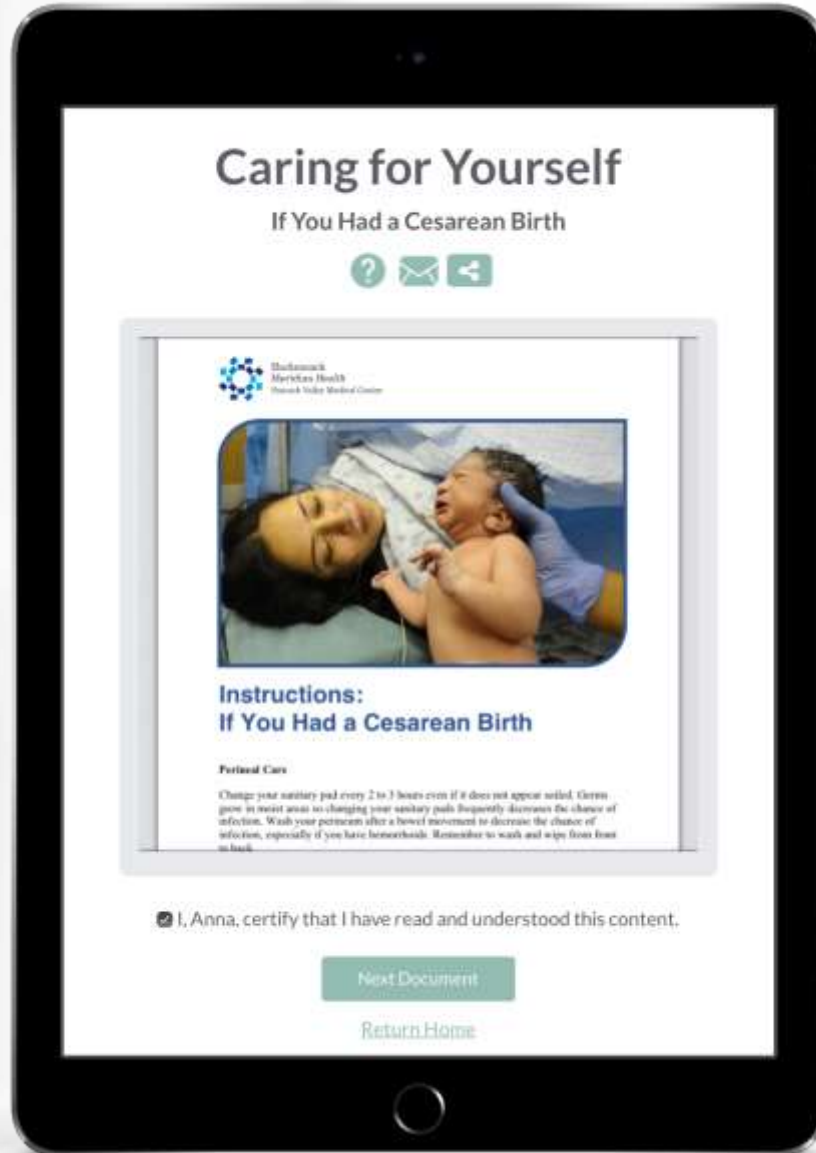

GOMOHEALTH

Patients' first view:
Table of contents
organized by "class."

As they select a class, the courses within that class are displayed.

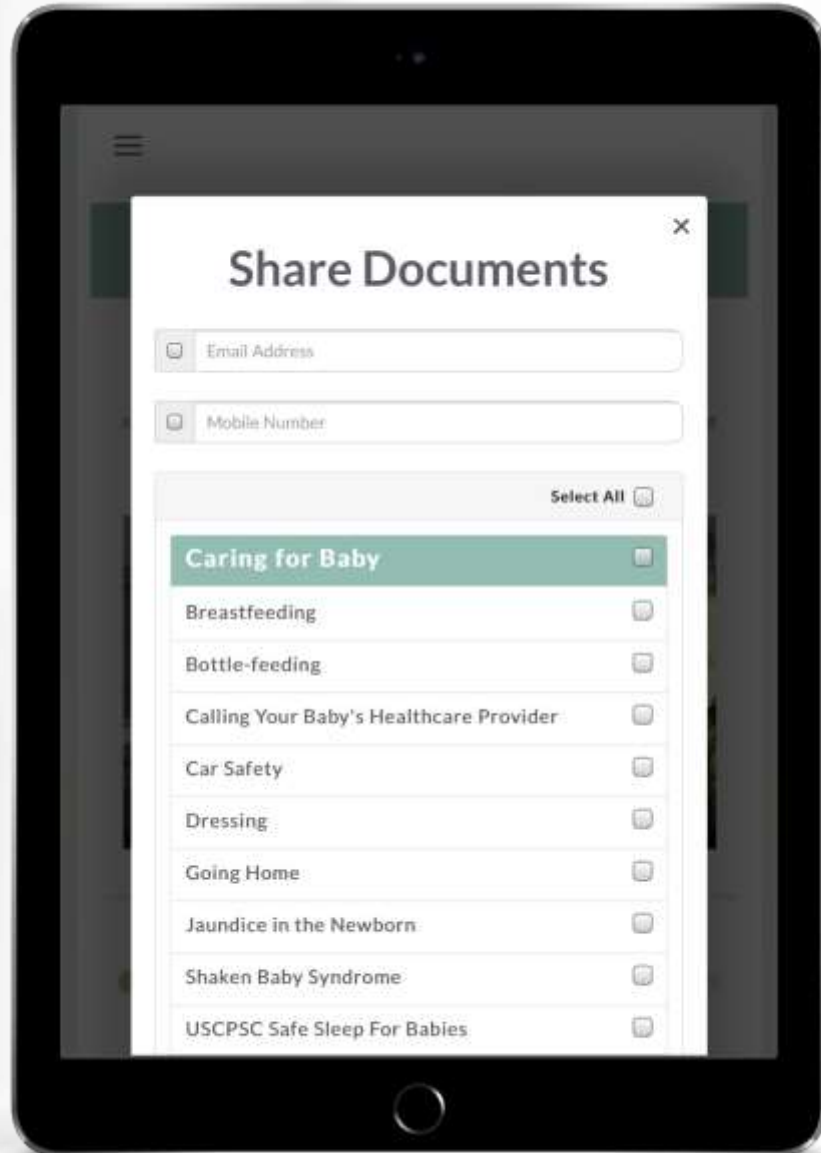

- Patients read, acknowledge understanding of content and move to next piece of information comfortably at their own pace.

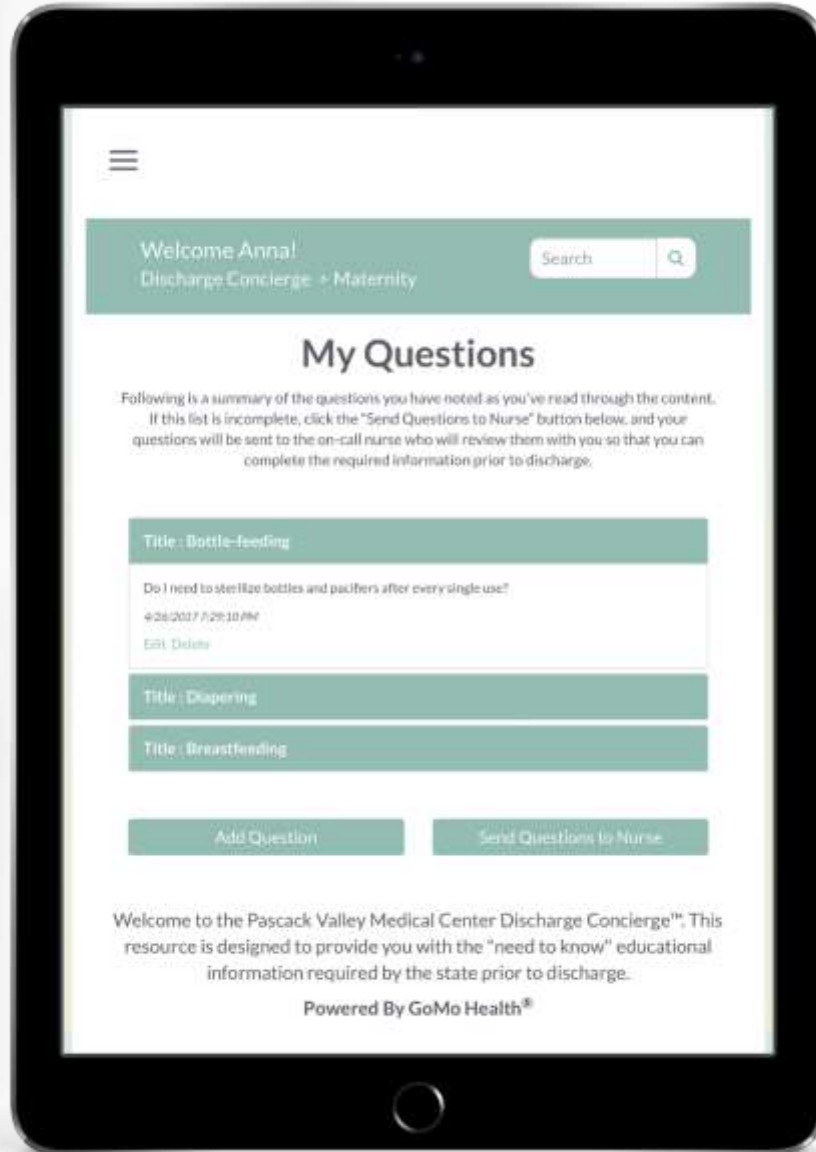

In-the-Moment Patient Experience

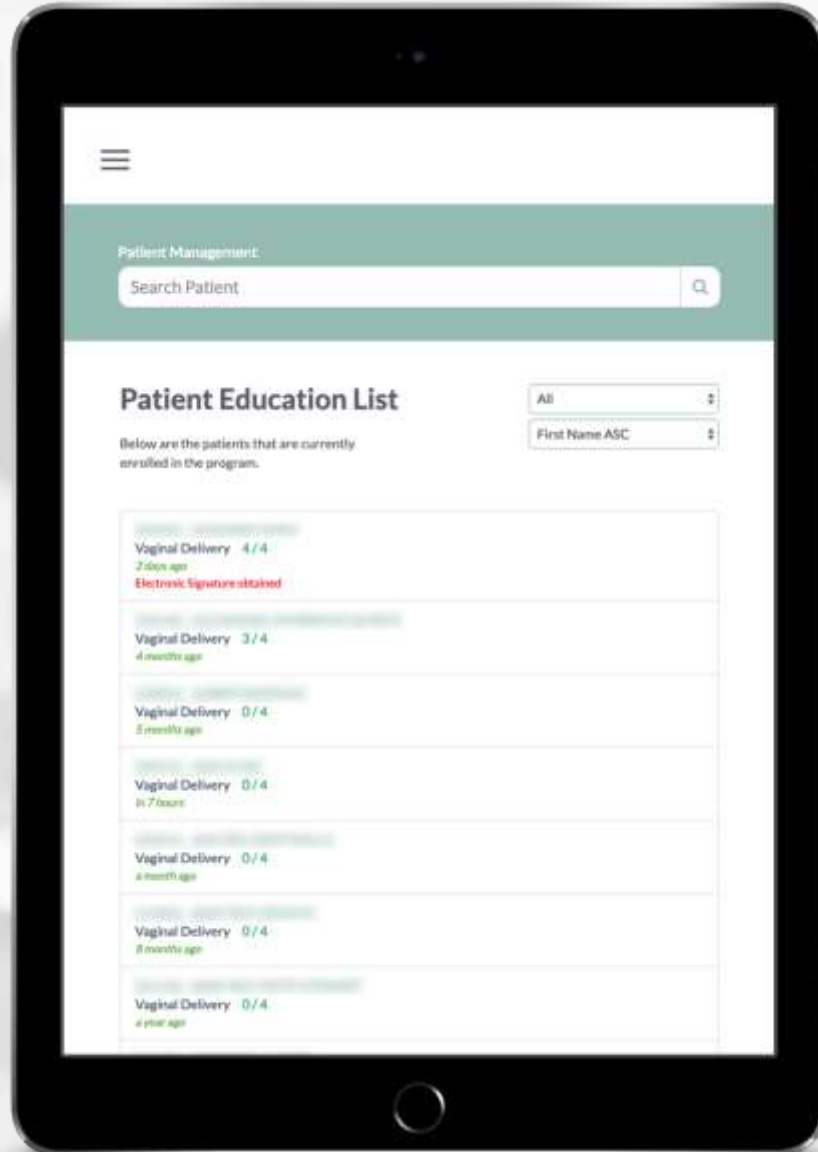

GOMOHEALTH

- Patients have option to share info with themselves or a caregiver (text or email) for post discharge reference.

- Any patient questions for clarification are noted in a notepad.

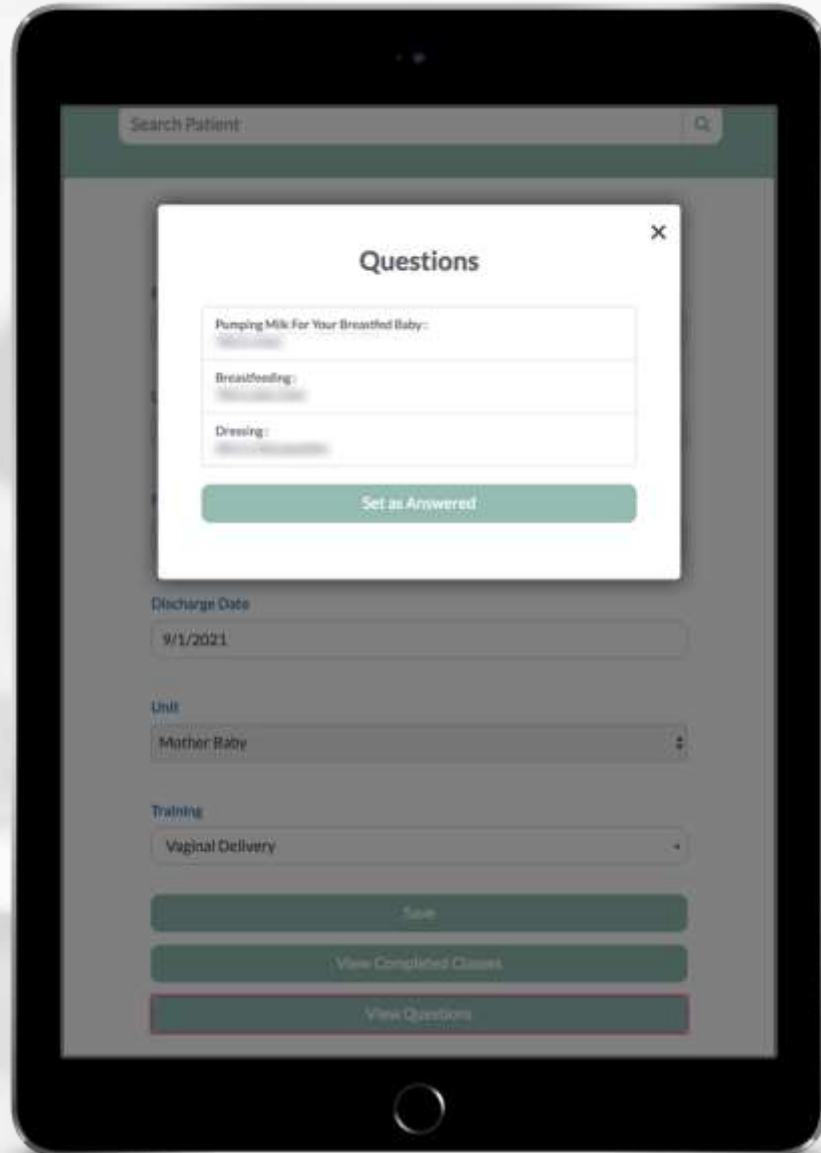

- Nurses preview patient completion status in admin panel, reviewing any patient questions and allowing nurses to prep to respond before discussing with patient.

BECKER'S _____
HOSPITAL REVIEW

HOT OFF THE PRESS:

**GoMo Health Named in Top 70 Population Health Management
Companies to Know In 2017 by Becker's Hospital Review**

(published 8-3-2017)

- Hospitals and health systems across the country are developing and implementing population health initiatives aimed at providing better patient care, wellness and prevention.
- Population health efforts can include targeting at-risk populations for diagnostic testing and preventative measures, chronic care management and home care support.
- Population health initiatives rely on data gathering and analytics to develop an understanding of patient populations and gaps of care.
