

Santosh Mohan serves as the Head of the More Disruption Please (MDP) Labs at athenahealth, fostering the next generation of healthcare innovators. He is a Duke Fuqua Scholar in clinical informatics and the recipient of HIMSS Founders Leadership Award. Prior to his current role at athenahealth, Mohan served as a Digital Solutions Management Fellow at Stanford Health Care and helped the organization achieve EMRAM Stage 7 inpatient and outpatient validations. Earlier in his career, he worked on technology-enabled innovation at Duke University Health System and Cerner Corporation and served as a Senior Consultant and Director at The Advisory Board Company. Mohan holds a master's degree in business management and clinical informatics from Duke Fuqua School of Business and a bachelor's degree in engineering and bioinformatics. He is a member of the HIMSS User Experience Committee and the immediate past-chairperson of the HIMSS Innovation Committee.
