

WISCONSIN DAIRYLAND Chapter

THURSDAY, OCTOBER 4TH DAIRYLAND HIMSS PRESENTS –

YOU'VE BEEN HACKED – NOW WHAT?

Join WI Dairyland HIMSS for an educational and interactive exercise based on a hypothetical security event

Bad stuff happens. How your company responds to a data breach, device loss or ransomware event will either minimize or compound the impact of the event. In this session, we will review components of an effective Incident Response Program (IRP) and facilitate an interactive group tabletop exercise to simulate the decision that needs to be made during a crisis.

Jeff is a frequent speaker and author on risk management-related topics including cybersecurity, incident response, and business continuity planning. As an active participant in various associations and within the community, he is frequently interviewed for his insight on how companies can improve their cybersecurity and business continuity preparedness.

PRESENTER
Jeff Olejnik

SESSION
You've Been Hacked – Now What?

**CAHIMS/CPHIMS
CEU OFFERED**
1.5 Hours

LOCATION:
THE GREAT DANE
